PROFESSIONAL SUMMARY

MCA graduate and full-stack developer with hands-on experience building database-driven web applications using Python, Django REST Framework, ASP.NET Core/MVC, React.js, MySQL, and REST APIs. Skilled in developing CRUD systems, secure authentication modules, and responsive user interfaces, with a strong foundation in OOP, MVC/MVT, SQL, and database design. Also built AI/ML applications using CNN, TensorFlow, OpenCV, NumPy, pandas, and scikit-learn, including image classification and model integration into web applications.

TECHNICAL SKILLS

Languages	Python, C#, C++, JavaScript, SQL
Backend	Django, Django REST Framework, ASP.NET Core, ASP.NET MVC, REST APIs, JWT Authentication
Frontend	React.js, HTML5, CSS3, Bootstrap, Recharts
Databases	MySQL, SQL, database design, joins, indexing, query optimization
AI/ML	TensorFlow, CNN, OpenCV, NumPy, pandas, scikit-learn, image classification
Tools	Git, GitHub, Power BI
Concepts	OOP, MVC, MVT, CRUD, authentication, authorization

WORK EXPERIENCE

Developer | Qsys Info Tech, Kumbakonam

March 2024 – August 2024

- Developed database-driven web applications and college website modules using ASP.NET/C#, MySQL, HTML, CSS, Bootstrap, and JavaScript, based on institutional requirements.
- Integrated frontend interfaces, backend logic, REST APIs, and database operations to deliver end-to-end application workflows.
- Structured and optimized complex MySQL queries and database structures to support data management, reporting, and transactional workflows.
- Implemented authentication, authorization, and CRUD functionality across application modules, ensuring secure and reliable data operations.
- Built responsive user interfaces with Bootstrap, HTML5, CSS3, and JavaScript, improving usability across desktop and mobile devices.
- Collaborated directly with clients and stakeholders to gather requirements, clarify functional needs, propose technical solutions, and deliver features aligned with business goals.

PROJECTS

Expense Management System with Authentication and Reporting

July 2026

Python | Django REST Framework | React.js | MySQL | JWT | Recharts | Bootstrap

- Developed a full-stack expenditure management application using Django REST Framework and React for secure tracking of deposits, expenses, and account balances.
- Implemented JWT-based authentication and OTP email verification for secure user registration, login, and account activation workflows.
- Built interactive dashboards and reports for date-wise, weekly, monthly, and yearly spending analysis using React and Recharts.
- Designed financial data models with automated balance recalculation logic to ensure accurate ledger updates, spending summaries, and historical tracking.
- Created a responsive, user-friendly interface with Bootstrap and React components to improve usability.

Acute Lymphoblastic Leukemia Detection System

March 2026

Python | CNN | TensorFlow | OpenCV | NumPy | Django | React

- Developed a CNN-based image-classification model to classify blood-smear images for Acute Lymphoblastic Leukemia research.
- Applied image preprocessing using OpenCV and NumPy and trained the model using TensorFlow.
- Built a Django backend and React frontend to upload images and display model predictions.
- Integrated CBC-related inputs as an additional decision factor.
- Evaluated the model using accuracy, precision, recall, and F1-score.

Billing and Inventory Management System

April 2024

ASP.NET | C# | MySQL

- Developed a WinForms application for invoice generation, inventory tracking, GST calculation, and sales reporting.
- Implemented stock validation to prevent billing quantities from exceeding available inventory.
- Designed database tables and SQL queries for products, customers, invoices, and stock transactions.
- Built forms and dashboards using C# and WinForms controls, with CRUD operations and validation for product and transaction records.

EDUCATION

Master of Computer Applications (MCA) – 8.36 CGPA

2024 – 2026

Government Arts College (Autonomous), Kumbakonam | Bharathidasan University

Bachelor of Computer Applications (BCA) – 8.32 CGPA

2021 – 2024

Government Arts College (Autonomous), Kumbakonam | Bharathidasan University

CERTIFICATIONS

Data Analytics using Power BI – Microsoft

2024

Foundation on Cloud – IBM SkillsBuild

2023

Advanced .NET Framework – Qvesys Info Tech

2023

ACHIEVEMENTS

- Published a conference abstract, “A Survey on Navigating the World of Artificial Intelligence: From Origins to Impacts” (No. 2024:141), at the National Conference on Emerging Trends in Artificial Intelligence (NCETAI-2024), organized by the PG & Research Department of Computer Science with IQAC, 19–20 February 2024 (ISBN: 978-93-84008-04-8).
